4685642	Danimarca	1	Software developers	Tempo indeterminato	Inglese fluente	Da definire	<p>As Statistical Programmer your overall focus is to turn complex data into clearly organised reports providing insights and recommendations for your colleagues. You will do this by developing SAS programs for preparing and reporting clinical data for statistical analysis. You will be preparing output for aggregated documents and publications as well as supporting regulatory commitments. Organisation and submission of data in accordance to international data standards (e.g. CDISC) is also an important task for the Statistical Programmer. You will be involved in coordination and supervision of the deliverables from contract houses around the world performing outsourced programming tasks. For the more experienced Statistical Programmer, your primary responsibilities will be to guide and set directions for statistical programming in accordance with Novo Nordisk programming standards and standards set by regulatory authorities. You will advise Biostatistics management and fellow statistical programmers with respect to programming strategy, submission data standards and technical issues. Qualifications: You have an M.Sc. or Ph.D. within Science, IT or a related area and extensive knowledge of programming and handling of databases. Extensive experience with clinical development and SAS programming language as well as knowledge of CDISC SDTM and ADaM standards is a requirement. You are able to write efficient, well documented and standardised computer programs. Excellent analytical skills as well as an understanding for data structure are a necessity. The job requires good coordination and planning skills combined with the ability to work in a flexible manner.</p> <p>Employer: NOVO NORDISK A/S Contact person: Karoline Bertelsen Rønje.</p>
44852058	Regno Unito	1	Financial and investment advisers	Tempo indeterminato	Inglese fluente	25000 - 28000 GBP	<p>The Original Equipment (OE) Sales department in Burton on Trent is looking for an Analyst. Tasks include: • Interpreting and analysing customer demand, ensuring tyre production meets the requirement • Sales monitoring analysis, sales forecasting and price forecasting • Working within the team to facilitate deliveries including meeting scheduled customer requirement, delivery slot management and coordinating third party logistics suppliers • Monitoring stock availability and taking corrective actions where necessary • Updating competitor analysis using the company's online portals • Supporting the OE Business Partner with the monthly forecasting of volume and pricing • Supporting the Senior OE Controller, interpreting and analysing customer demand, ensuring tyre production meets the requirement • Managing and maintaining POD database to ensure all documentation is complete and working with third parties to ensure all signatures are in place • Working within the team to facilitate deliveries including meeting scheduled customer requirement, delivery slot management and coordinating third party logistics suppliers • Maintaining strong relationships between UK and Head Office functions, ensuring coordination and implementation of group strategy. A good level of general education is required (degree level desirable). As OE Analyst, you will possess a good level of IT skills which must include Excel. Your communication skills should be good. The role will involve communicating with UK and international colleagues, so the ability to develop and maintain strong relationships is key. We communicate regularly with Milan, so the ability to speak Italian would be beneficial but not essential.
